

Welcome to our website! This resource was created by the **Center for Monitoring Studies and Environmental Technologies – “Ecomonitor” LLC**

We started our activity as an independent scientific advisory organization in 2000 to attract experts on environmental and radiation safety and environmental performance to national and international interdisciplinary projects.

The main mission of Ecomonitor is to organize and support the implementation of integrated projects in areas of wide range of issues: environmental monitoring, environmental and radiation safety assessment, rehabilitation reasoning, Hydrometeorology problems, dissemination of international experience and technology to ensure regulatory and environmental rehabilitation activities.

On the pages of our website you can learn more about us, our activities, projects and our partners.

We welcome your proposals, suggestions, talks and initiatives!
